NA = not available; s = suppressed for reasons of confidentiality or reliability.

^a Family income is categorized as follows: low income includes families in the lowest 20% of income distribution, middle income includes families in the middle 60%, and high income includes families in the highest 20%.^b Because of the small sample size for racial and ethnic categories, data are subject to relatively large sampling errors. Therefore, 3-year moving averages are used to produce more stable estimates. The 3-year moving average is an arithmetic average of the rates in the year indicated, the year immediately preceding, and the year immediately following. For 1975 and 2013, a 2-year moving average is used. Data for 1975 reflect an average of 1975 and 1976, and data for 2013 reflect an average of 2012 and 2013. Starting from 2003, data for white, black or African American, and Asian students exclude individuals identifying themselves as more than one race.^c This refers to the highest level of education achieved by either parent.^d Hispanic may be any race; race categories exclude Hispanic origin.**Note(s)**

The table includes students ages 16 to 24 who completed high school in the survey year. Before 1992, high school graduates referred to those who had completed 12 years of schooling. As of 1992, high school graduates refer to those who have received a high school diploma or equivalency certificate.
