TABLE S8-42

U.S. specialization index of patent families, by WIPO technical field: 1998–2018

(Index)

WIPO technical field	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Transport	0.96	0.82	0.98	0.99	0.93	0.82	0.85	0.82	0.82	0.84	0.71	0.70	0.75	0.77	0.75	0.74	0.77	0.97	1.00	1.11	1.28

IT = Information Technology; WIPO = World Intellectual Property Organization.

Note(s)

International Patent Documentation (INPADOC) patent families across all patent offices covered in the Worldwide Patent Statistical Database (PATSTAT) are counted according to the year of the first granted patent in the patent family. Patent families are allocated according to patent inventorship information found on the priority patent of the INPADOC patent families. To account for missing ownership information in PATSTAT for some offices, a method designed by de Rassenfosse et al. (2012) is used to fill in missing information on priority patents using information in successive filings within the patent families (see technical documentation for details). Patent families are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patent families unclassified under the WIPO classification are not accounted for in the total when normalization is performed in the computation of the specialization index to avoid underestimating specialization for countries where these unclassified families are more prominent because of data gaps in International Patent Classification codes availability in PATSTAT.
