<sup>a</sup> Income tiers are based on 2019 family incomes that have been adjusted for household size and cost of living in respondents' geographic region. Middle income includes respondents whose family incomes are between two-thirds of and double the median adjusted family income among the panel of respondents. For a three-person household, upper income is approximately \$116,801 and above, middle income is \$38,900–\$116,800, and lower income is less than \$38,900.
