

# NATIONAL SCIENCE BOARD SCIENCE & ENGINEERING INDICATORS 2024

## Innovation

# Invention, Knowledge Transfer, and Innovation

## Supplemental Tables

NSB-2024-1

February 29, 2024

This publication is part of the 2024 edition of the *Science and Engineering Indicators (Indicators)* suite of reports. *Indicators* is prepared under the guidance of the National Science Board by the National Science Foundation's National Center for Science and Engineering Statistics. The *Indicators* suite consists of a summary report called *The State of U.S. Science and Engineering*, more-detailed thematic reports with supporting data, and a data tool that provides state-level indicators.

## Supplemental Tables

Table	Title
SINV-1	USPTO utility patents granted to owners, by sector: 2000–22
SINV-2	Regions, countries, or economies in patent and trademark data: 1998–2022
SINV-3	Technical fields, by fields of technology in patent data: 1998–2022
SINV-4	USPTO utility patents granted to inventors, by selected region, country, or economy: 2000–22
SINV-5	USPTO utility patents granted in chemistry, by selected region, country, or economy: 2000–22
SINV-6	USPTO utility patents granted in electrical engineering, by selected region, country, or economy: 2000–22
SINV-7	USPTO utility patents granted in instruments, by selected region, country, or economy: 2000–22
SINV-8	USPTO utility patents granted in mechanical engineering, by selected region, country, or economy: 2000–22
SINV-9	USPTO utility patents granted in other fields, by selected region, country, or economy: 2000–22
SINV-10	USPTO utility patents granted in semiconductors, by selected region, country, or economy: 1998–2022
SINV-11	Patent Cooperation Treaty applications, by region, country, or economy: 2000–22
SINV-12	Patent Cooperation Treaty applications in chemistry, by region, country, or economy: 2000–22
SINV-13	Patent Cooperation Treaty applications in electrical engineering, by region, country, or economy: 2000–22
SINV-14	Patent Cooperation Treaty applications in instruments, by region, country, or economy: 2000–22
SINV-15	Patent Cooperation Treaty applications in mechanical engineering, by region, country, or economy: 2000–22
SINV-16	Patent Cooperation Treaty applications in other fields, by region, country, or economy: 2000–22
SINV-17	Worldwide granted utility patents in AI, by selected region, country, or economy: 2000–22
SINV-18	Granted AI patents in AI techniques, functional applications, and application fields, by selected region, country, or economy: 2000–22
SINV-19	Proportion of matched and unmatched cases for gender analysis: 2000–22
SINV-20	U.S. university USPTO utility patent awards, by WIPO technical field: 2000–22
SINV-21	Citations of S&E articles in USPTO utility patents, by cited field, cited author country, and patent sector: 2013–22
SINV-22	Patents granted to U.S. federal agencies, by technology area: 2013–22
SINV-23	Patents granted to U.S. federal agencies, by inventor's agency of employment: 2013–22
SINV-24	Scholarly publications with authors from U.S. federal agencies, by S&E discipline: 2013–22
SINV-25	S&E articles with authors from U.S. federal agencies, by author's affiliated agency: 2013–22

Table	Title
SINV-26	S&E articles with authors at federal agencies cited by granted U.S. patents, by article field: 2013–22
SINV-27	S&E articles with authors at federal agencies cited by granted U.S. patents, by author's affiliated agency: 2013–22
SINV-28	New technology licenses issued to nonfederal licensees, by agency: FYs 2011–20
SINV-29	GitHub repositories contributed to by selected entities: 2009–19
SINV-30	Total SBIR or STTR Phase II funding, by federal agency: 2013–22
SINV-31	Venture capital invested in firms headquartered in selected regions, countries, or economies: 2003–22
SINV-32	Firms receiving venture capital investment, by state of firm headquarters: 2003–22
SINV-33	U.S.-headquartered firms receiving venture capital investments, by Primary Industry Code: 2003–22
SINV-34	PitchBook venture capital Primary Industry Code-to-industry classification: 2003–22
SINV-35	Registered USPTO trademarks, by region, country, or economy: 1998–2022
SINV-36	Nice classes in trademark data, by business sector: 1998–2022
SINV-37	U.S.-registered USPTO trademarks, by Nice class: 1998–2022
SINV-38	Registered USPTO trademarks in the business sector of agriculture, by region, country, or economy: 1998–2022
SINV-39	Registered USPTO trademarks in the business sector of business services, by region, country, or economy: 1998–2022
SINV-40	Registered USPTO trademarks in the business sector of chemicals, by region, country, or economy: 1998–2022
SINV-41	Registered USPTO trademarks in the business sector of clothing, by region, country, or economy: 1998–2022
SINV-42	Registered USPTO trademarks in the business sector of construction, by region, country, or economy: 1998–2022
SINV-43	Registered USPTO trademarks in the business sector of health, by region, country, or economy: 1998–2022
SINV-44	Registered USPTO trademarks in the business sector of household equipment, by region, country, or economy: 1998–2022
SINV-45	Registered USPTO trademarks in the business sector of leisure and education, by region, country, or economy: 1998–2022
SINV-46	Registered USPTO trademarks in the business sector of research and technology, by region, country, or economy: 1998–2022
SINV-47	Registered USPTO trademarks in the business sector of transportation, by region, country, or economy: 1998–2022
SINV-48	Registered USPTO trademarks unassigned under the Nice Classification, by region, country, or economy: 1998–2022

Table	Title
SINV-A	USPTO utility patents granted in all environmental sustainability technologies, by region, country, or economy: 1998–2022
SINV-B	USPTO utility patents granted in environmental management, by region, country, or economy: 1998–2022
SINV-C	USPTO utility patents granted in climate change mitigation technologies related to energy generation, transmission, or distribution, by region, country, or economy: 1998–2022
SINV-D	USPTO utility patents granted in capture, storage, sequestration, or disposal of greenhouse gases, by region, country, or economy: 1998–2022
SINV-E	USPTO utility patents granted in climate change mitigation technologies related to transportation, by region, country, or economy: 1998–2022
SINV-F	USPTO utility patents granted in climate change mitigation technologies related to buildings, by region, country, or economy: 1998–2022
SINV-G	USPTO utility patents granted in climate change mitigation technologies related to wastewater treatment or waste management, by region, country, or economy: 1998–2022
SINV-H	USPTO utility patents granted in climate change mitigation technologies in the production or processing of goods, by region, country, or economy: 1998–2022
SINV-I	USPTO utility patents granted in climate change mitigation in information and communications technologies, by region, country, or economy: 1998–2022
SINV-J	USPTO utility patents granted in climate change adaptation technologies, by region, country, or economy: 1998–2022
SINV-K	USPTO utility patents granted in sustainable ocean economy, by region, country, or economy: 1998–2022
SINV-L	USPTO utility patents granted in climate change adaptation technologies in agriculture, forestry, livestock, or agroalimentary production, by region, country, or economy: 1998–2022
SINV-M	USPTO utility patents granted in climate change mitigation technologies relating to agriculture, livestock, or agroalimentary industries, by region, country, or economy: 1998–2022

Table SINV-1

## USPTO utility patents granted to owners, by sector: 2000–22

(Number)

Owner and sector	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Total	157,595	166,158	167,400	169,077	164,384	143,891	173,822	157,331	157,788	167,463	219,848	224,871	253,633	278,518	301,643	299,382	304,126	320,003	308,853	355,923	353,701	329,097	324,698
Assigned to foreign owner	69,232	75,250	77,832	79,037	78,084	67,615	82,239	76,192	78,216	83,055	109,149	113,068	128,616	139,354	150,216	151,166	152,731	159,565	154,380	177,043	176,569	166,580	172,529
Assigned to owner from unknown location	49	45	50	37	23	20	33	47	27	28	33	33	26	35	53	29	39	25	19	25	35	50	66
Assigned to U.S. owner	88,314	90,863	89,518	90,003	86,277	76,256	91,551	81,092	79,545	84,380	110,667	111,770	124,991	139,130	151,374	148,187	151,356	160,413	154,454	178,854	177,097	162,467	152,102

USPTO = Patent and Trademark Office.

**Note(s):**

Patents are allocated according to patent ownership information. Patents are credited on a fractional-count basis (i.e., for patents with collaborating institutions, each institution receives fractional credit on the basis of the proportion of inventors from participating institutions). Business covers the for-profit business sector. Government includes federal, state, local, and municipal and federally funded research and development centers. Other includes private nonprofits, such as foundations, associations, nonacademic hospitals, and research-performing institutions.

National Center for Science and Engineering Statistics; Science-Metrix; PatentsView, USPTO, accessed June 2023.

Science and Engineering Indicators

Table SINV-2

**Regions, countries, or economies in patent and trademark data: 1998–2022**

(Regions, countries, or economies)

North America	Central America and Caribbean	South America	EU	Other Europe	Middle East	Africa	Asia	Australia and Oceania
Canada	Antigua and Barbuda	Argentina	EU-27 and United Kingdom	Albania	Armenia	Algeria	Afghanistan	Australia
Greenland	Bahamas, The	Bolivia	United Kingdom <sup>a</sup>	Andorra	Azerbaijan	Angola	Bangladesh	Cook Islands
Mexico	Barbados	Brazil	EU-27 <sup>b</sup>	Belarus	Bahrain	Benin	Brunei	Fiji
United States	Belize	Chile	Austria	Bosnia and Herzegovina	Georgia	Burkina Faso	Burma	Kiribati

EU-27 = European Union.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

The United States includes Puerto Rico and all other U.S. territories.

*Science and Engineering Indicators*

Table SINV-3

**Technical fields, by fields of technology in patent data: 1998–2022**

(Category)

Technical field	Fields of technology
Basic materials chemistry	Chemistry
Biotechnology	Chemistry
Chemical engineering	Chemistry
Environmental technology	Chemistry
Food chemistry	Chemistry
Macromolecular chemistry, polymers	Chemistry
Materials, metallurgy	Chemistry
Microstructural and nanotechnology	Chemistry
Organic fine chemistry	Chemistry
Pharmaceuticals	Chemistry
Surface technology, coating	Chemistry
Audio-visual technology	Electrical engineering
Basic communication processes	Electrical engineering
Computer technology	Electrical engineering
Digital communication	Electrical engineering
Electrical machinery, apparatus, energy	Electrical engineering
IT methods for management	Electrical engineering
Semiconductors	Electrical engineering
Telecommunications	Electrical engineering
Analysis of biological materials	Instruments
Control	Instruments
Measurement	Instruments
Medical technology	Instruments
Optics	Instruments
Engines, pumps, turbines	Mechanical engineering
Handling	Mechanical engineering
Machine tools	Mechanical engineering
Mechanical elements	Mechanical engineering
Other special machines	Mechanical engineering
Textile and paper machines	Mechanical engineering
Thermal processes and apparatus	Mechanical engineering
Transport	Mechanical engineering
Civil engineering	Other fields
Furniture, games	Other fields
Other consumer goods	Other fields

IT = information technology.

**Note(s):**

Patent and Trademark Office patents and international patent families are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields and 5 fields of technology.

**Source(s):**

National Center for Science and Engineering Statistics; Science-Metrix; WIPO, IPC, accessed June 2021.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Patents are allocated according to patent ownership information. Patents are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Patents are allocated according to patent ownership information. Patents are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Patents are allocated according to patent ownership information. Patents are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under the World Intellectual Property Organization (WIPO) classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = World Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.

<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = World Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Technology areas are derived from the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Technology areas are derived from the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = World Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.

<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Technology areas are derived from the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = World Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.

<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Technology areas are derived from the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

EU-27 = European Union; IPO = Intellectual Property Organization; WIPO = World Intellectual Property Organization.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.

<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

Figures are based on publication year of Patent Cooperation Treaty (PCT) applications. Technology areas are derived from the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>. Countries are allocated using the receiving office for each PCT application, which is based on the location of the inventors. In cases where PCT applications are filed directly with WIPO via its international bureau, the priority country of the earliest document in the same patent family is used (i.e., where the first application in the patent family was filed). In terms of the regional patent offices, applicants can choose to file PCT applications via these offices rather than their home country. As such, the IPO counts are in addition to the sum of its constituent country counts. The European Patent Office (EPO) is counted toward the EU-27 in the figures because the constituent countries are largely the same. Although the United Kingdom is no longer a member of the EU, it remains a signatory to the European Patent Convention and can still file via EPO. China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

AI = artificial intelligence; EU-27 = European Union.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

Granted patents for all patent authorities are allocated according to patent inventorship information. AI patents are identified and divided into categories using filters consisting of Cooperative Patent Classifications and International Patent Classifications plus keywords and phrases. Details of these filters can be found at <https://github.com/georgetown-cset/1790-ai-patent-data/>. Only the first granted patent in each patent family is counted so as to avoid double counting the same invention. Patent families containing no granted patents are excluded. Country assignments are based on fractional counting of inventor locations as listed in the associated record from the Global Patent Index. If no inventor countries are listed, the priority country is used (i.e., where the first application in the patent family was filed). China includes Hong Kong. The world total is the sum of individual countries. There is no row duplication.

AI = artificial intelligence; IOT = Internet of Things.

**Note(s):**

Granted patents for all patent authorities are allocated according to patent inventorship information. AI patents are identified and divided into categories using filters consisting of Cooperative Patent Classifications and International Patent Classifications plus keywords and phrases. Details of these filters can be found at <https://github.com/georgetown-cset/1790-ai-patent-data/>. Only the first granted patent in each patent family is counted so as to avoid double counting the same invention. Patent families containing no granted patents are excluded. Country assignments are based on fractional counting of inventor locations as listed in the associated record from the Global Patent Index. If no inventor countries are listed, the priority country is used (i.e., where the first application in the patent family was filed). The patent families in the AI patent database are categorized along three dimensions, available at <https://github.com/georgetown-cset/1790-ai-patent-data/>.

- AI techniques: How does the invention work? (e.g., machine learning, logic models, fuzzy logic)

- Functional applications: What does the invention do? (e.g., speech processing, computer vision, control systems)
- Application fields: Where can the invention be used? (e.g., life sciences, transportation, energy management)

The three dimensions build on the Computing Classification System developed by the Association for Computing Machinery. Within each dimension, a patent family may be included in more than one category. China includes Hong Kong.

Total	5,463,625	628,403	89.7	10.3

**Note(s):**

The analysis of patenting by gender is based on patents granted by the Patent and Trademark Office (USPTO). Fractional counting of inventors is used, with the credit for each patent divided equally between the inventors. The gender of inventors is determined using the World Intellectual Property Organization (WIPO) World Gender-Name Dictionary Version 2.0, available at <https://dataverse.harvard.edu/dataverse/WGND>. The process for matching inventor names to genders is based on the WIPO guidelines described at <https://tind.wipo.int/record/45020?ln=en>. Technology areas are based on the WIPO concordance of International Patent Classifications to technology categories available at <https://www.wipo.int/ipstats/en/>.

IT = information technology; USPTO = Patent and Trademark Office; WIPO = World Intellectual Property Organization.

**Note(s):**

Patents are allocated according to patent ownership information. Data include institutions affiliated with academic institutions, such as university and alumni organizations, foundations, university associations, and affiliated hospitals. Universities vary in how patents are assigned (e.g., to boards of regents, individual campuses, or entities with or without affiliation with the university). Patents are classified under the WIPO classification of patents, which classifies International Patent Classification (IPC) codes under 35 technical fields. IPC reformed codes take into account changes that were made to the WIPO classification in 2006 under the eighth version of the classification and were used to prepare these data. However, because PatentsView only provides the original IPC codes as they appeared on patents and not the IPC reformed codes, current Cooperative Patent Classification codes on patents were converted back to the most recent IPC classification to prepare these statistics. Fractional counts of patents were assigned to each technological field on patents to assign the proper weight of a patent to the corresponding technological fields under the classification. For instance, a patent that is classified under five different technological fields will see each of its technological fields receive a 0.2 count of the patent, so that the patent accounts for a count of 1.0 across all technological fields. Patents were also fractionally allocated among regions, countries, or economies based on the proportion of residences of all assignees. As such, data across technical fields sum to the total number of granted academic patents in the United States. Data across technical fields also sum to the total number of patents granted by USPTO. The United States includes Puerto Rico and all other U.S. territories.

Table SINV-22

**Patents granted to U.S. federal agencies, by technology area: 2013–22**

(Number)

Technology area	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Unclassified	2	1	0	0	0	0	2	1	2	0

**Note(s):**

Data are presented by calendar year. Patents are credited on a whole-count basis (i.e., each participating federal agency is credited one count). However, fractioning is used at the level of International Patent Classification codes to ensure that the sum of patents across technology areas (World Intellectual Property Organization technology classification) is equal to the total number of patents as each patent can be assigned to more than one technology area. Note that because more than one agency may appear on a single patent, the sum across agencies is slightly higher than the total for all agencies.

**Note(s):**

Data are presented by calendar year. Taxonomy of Discipline (TOD) fields are used to classify articles. The TOD is a classification scheme developed by the National Science Foundation to suit its need for a unified scheme. Science-Matrix developed an alignment of its own classification scheme with the TOD, and this alignment replaces the WebCASPAS classification that was used in the past to produce bibliometric data for the *Science and Engineering Indicators* reports. Journals are assigned to a unique TOD except for generalist journals, such as *Science* and *Nature*, for which articles are instead reclassified individually in TOD fields using an automated procedure based on machine-learning techniques. Articles are credited on a whole-count basis (i.e., each participating federal agency receives one count). The sum of the individual federal agencies may exceed the total across agencies because articles may have authors from multiple federal agencies.

**Note(s):**

Data are presented by calendar year. Taxonomy of Discipline (TOD) fields are used to classify articles. The TOD is a classification scheme developed by the National Science Foundation to suit its need for a unified scheme. Science-Metrix developed an alignment of its own classification scheme with the TOD and this alignment replaces the WebCASPAS classification that was used in the past to produce bibliometric data for the *Science and Engineering Indicators* reports. Journals are assigned to a unique TOD except for generalist journals, such as *Science* and *Nature*, for which articles are instead reclassified individually in TOD fields using an automated procedure based on machine-learning techniques. Citation counts are based on an 11-year window with a 5-year lag (e.g., citations for 2012 are references in Patent and Trademark Office patents issued in calendar year 2012 to articles published in 1997–2007). Annual totals may be lower than the sum of numbers presented by field because some articles have authors from multiple federal agencies.

na = not applicable; no items are assigned to the entity.

**Note(s):**

Included repositories are those with an Open Source Initiative–approved open-source license; software shared through other licenses are excluded. Public higher education institutions and selected private entities are included as benchmarks. Overall in terms of number of repositories contributed to, Microsoft and RedHat are the two largest contributors from the private sector and University of California, Berkeley, is the largest contributor from higher education institutions. The highest contributor to open-source software is the Department of Energy (DOE), which encompasses 17 national laboratories, 16 of which were included in the data. The exception is DOE's SLAC National Accelerator Laboratory, formerly known as Stanford Linear Accelerator. Due to data constraints, these repositories are attributed to the operator rather than to DOE.

Table SINV-34

**PitchBook venture capital Primary Industry Code-to-industry classification: 2003-22**

(Industry classification based on PitchBook Primary Industry Code)

Primary Industry Code (PitchBook)	Industry classification
Accessories	Consumer goods and services
Accounting, audit and tax services (B2B)	Commercial services
Accounting, audit and tax services (B2C)	Consumer goods and services
Aerospace and defense	Transportation and defense
Agricultural chemicals	Agriculture and food
Air	Transportation and defense
Alternative energy equipment	Energy
Aluminum mining	Industrial products
Animal husbandry	Agriculture and food
Animal textiles	Agriculture and food
Application software	Software
Application specific semiconductors	IT hardware
Aquaculture	Agriculture and food
Asset management	Commercial services
Automation/workflow software	Software
Automotive	Transportation and defense
Automotive insurance	Financial services
Beverages	Agriculture and food
Biotechnology	Biomedical
BPO/outsource services	Commercial services
Broadcasting, radio and television	Information
Brokerage	Financial services
Building products	Industrial products
Buildings and property	Commercial services
Business equipment and supplies	Commercial services
Business/productivity software	Software
Cable service providers	Information
Casinos and gaming	Consumer goods and services
Catalog retail	Consumer goods and services
Clinics/outpatient services	Healthcare
Clothing	Consumer goods and services
Coal and consumable fuels equipment	Energy
Coal mining	Energy
Commercial/professional insurance	Financial services
Commodity chemicals	Industrial products
Communication software	Software
Computers, parts and peripherals	IT hardware
Conglomerates	Other
Connectivity products	IT hardware
Construction and engineering	Commercial services
Consulting services (B2B)	Commercial services
Consumer finance	Financial services
Cruise lines	Consumer goods and services
Cultivation	Agriculture and food
Database software	Software
Decision/risk analysis	Software
Department stores	Consumer goods and services
Diagnostic equipment	Biomedical
Discovery tools (healthcare)	Biomedical
Distributors (healthcare)	Healthcare
Distributors/wholesale	Commercial services

Table SINV-34

**PitchBook venture capital Primary Industry Code-to-industry classification: 2003-22**

(Industry classification based on PitchBook Primary Industry Code)

Primary Industry Code (PitchBook)	Industry classification
Distributors/wholesale (B2C)	Consumer goods and services
Drug delivery	Biomedical
Drug discovery	Biomedical
Education and training services (B2B)	Commercial services
Educational and training services (B2C)	Consumer goods and services
Educational software	Software
Elder and disabled care	Healthcare
Electric utilities	Energy
Electrical equipment	Industrial products
Electronic components	IT hardware
Electronic equipment and instruments	IT hardware
Electronics (B2C)	Consumer goods and services
Energy exploration	Energy
Energy infrastructure	Energy
Energy marketing	Energy
Energy production	Energy
Energy refining	Energy
Energy storage	Energy
Energy traders and brokers	Energy
Energy transportation	Energy
Enterprise systems (healthcare)	Software
Entertainment software	Software
Environmental services (B2B)	Commercial services
Fiberoptic equipment	IT hardware
Financial software	Software
Food products	Agriculture and food
Footwear	Consumer goods and services
Forestry development/harvesting	Agriculture and food
Forestry processing	Agriculture and food
Gas utilities	Energy
General merchandise stores	Consumer goods and services
General purpose semiconductors	IT hardware
Gold mining	Industrial products
Government	Other
Holding companies	Other
Home furnishings	Consumer goods and services
Horticulture	Agriculture and food
Hospitals/inpatient services	Healthcare
Hotels and resorts	Consumer goods and services
Household appliances	Consumer goods and services
Household products	Consumer goods and services
Human capital services	Commercial services
Industrial chemicals	Industrial products
Industrial supplies and parts	Industrial products
Information services (B2C)	Information
Infrastructure	Transportation and defense
Insurance brokers	Financial services
International banks	Financial services
Internet retail	Consumer goods and services
Internet service providers	Information
Internet software	Software

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

Table SINV-36

## Nice classes in trademark data, by business sector: 1998–2022

(Nice classes)

Business sector	Abbreviation (if applicable)	Nice class	Class description
		29	Meat, fish, poultry, and game; meat extracts; preserved, frozen, dried, and cooked fruits and vegetables; jellies, jams, compotes; eggs; milk, cheese, butter, yogurt, and other milk products; oils and fats for food.
		30	Coffee, tea, cocoa, and artificial coffee; rice, pasta, and noodles; tapioca and sago; flour and preparations made from cereals; bread, pastries, and confectionery; chocolate; ice cream, sorbets, and other edible ices; sugar, honey, treacle; yeast, baking powder; salt, seasonings, spices, preserved herbs; vinegar, sauces, and other condiments; ice (frozen water).
		31	Raw and unprocessed agricultural, aquacultural, horticultural, and forestry products; raw and unprocessed grains and seeds; fresh fruits and vegetables, fresh herbs; natural plants and flowers; bulbs, seedlings, and seeds for planting; live animals; foodstuffs and beverages for animals; malt.
		32	Beers; non-alcoholic beverages; mineral and aerated waters; fruit beverages and fruit juices; syrups and other non-alcoholic preparations for making beverages.
		33	Alcoholic beverages, except beers; alcoholic preparations for making beverages.
Agricultural products and services	Agriculture	43	Services for providing food and drink; temporary accommodation.
		1	Chemicals for use in industry, science, and photography, as well as in agriculture, horticulture, and forestry; unprocessed artificial resins, unprocessed plastics; fire extinguishing and fire prevention compositions; tempering and soldering preparations; substances for tanning animal skins and hides; adhesives for use in industry; putties and other paste fillers; compost, manures, fertilizers; biological preparations for use in industry and science.
		2	Paints, varnishes, lacquers; preservatives against rust and against deterioration of wood; colorants, dyes; inks for printing, marking, and engraving; raw natural resins; metals in foil and powder form for use in painting, decorating, printing, and art.
Chemicals	na	4	Industrial oils and greases, wax; lubricants; dust-absorbing, wetting, and binding compositions; fuels and illuminants; candles and wicks for lighting.
		6	Common metals and their alloys, ores; metal materials for building and construction; transportable buildings of metal; non-electric cables and wires of common metal; small items of metal hardware; metal containers for storage or transport; safes.
		17	Unprocessed and semi-processed rubber, gutta-percha, gum, asbestos, mica, and substitutes for all these materials; plastics and resins in extruded form for use in manufacture; packing, stopping, and insulating materials; flexible pipes, tubes, and hoses, not of metal.
		19	Materials, not of metal, for building and construction; rigid pipes, not of metal, for building; asphalt, pitch, tar, and bitumen; transportable buildings, not of metal; monuments, not of metal.
		37	Building construction; repair; installation services.
Construction and infrastructure	Construction	40	Treatment of materials.
		8	Hand tools and implements, hand-operated; cutlery; side arms, except firearms; razors.
		11	Apparatus and installations for lighting, heating, cooling, steam generating, cooking, drying, ventilating, water supply, and sanitary purposes.
		20	Furniture, mirrors, picture frames; containers, not of metal, for storage or transport; unworked or semi-worked bone, horn, whalebone, or mother-of-pearl; shells; meerschaum; yellow amber.

Table SINV-36

## Nice classes in trademark data, by business sector: 1998–2022

(Nice classes)

Business sector	Abbreviation (if applicable)	Nice class	Class description
Household equipment	na	21	Household or kitchen utensils and containers; cookware and tableware, except forks, knives, and spoons; combs and sponges; brushes, except paintbrushes; brush-making materials; articles for cleaning purposes; unworked or semi-worked glass, except building glass; glassware, porcelain, and earthenware.
		13	Firearms; ammunition and projectiles; explosives; fireworks.
		15	Musical instruments; music stands and stands for musical instruments; conductors' batons.
		16	Paper and cardboard; printed matter; bookbinding material; photographs; stationery and office requisites, except furniture; adhesives for stationery or household purposes; drawing materials and materials for artists; paintbrushes; instructional and teaching materials; plastic sheets, films, and bags for wrapping and packaging; printers' type, printing blocks.
		28	Games, toys, and playthings; video game apparatus; gymnastic and sporting articles; decorations for Christmas trees.
Leisure, education, and training	Leisure and education	41	Education; providing of training; entertainment; sporting and cultural activities.
		35	Advertising; business management; business administration; office functions.
Management, communications, real estate, and financial services	Business services	36	Insurance; financial affairs; monetary affairs; real estate affairs.
		3	Non-medicated cosmetics and toiletry preparations; non-medicated dentifrices; perfumery, essential oils; bleaching preparations and other substances for laundry use; cleaning, polishing, scouring, and abrasive preparations.
		5	Pharmaceuticals, medical, and veterinary preparations; sanitary preparations for medical purposes; dietetic food and substances adapted for medical or veterinary use, food for babies; dietary supplements for human beings and animals; plasters, materials for dressings; material for stopping teeth, dental wax; disinfectants; preparations for destroying vermin; fungicides, herbicides.
		10	Surgical, medical, dental, and veterinary apparatus and instruments; artificial limbs, eyes, and teeth; orthopedic articles; suture materials; therapeutic and assistive devices adapted for the disabled; massage apparatus; apparatus, devices, and articles for nursing infants; sexual activity apparatus, devices, and articles.
Pharmaceuticals, health, and cosmetics	Health	44	Medical services; veterinary services; hygienic and beauty care for human beings or animals; agriculture, horticulture, and forestry services.
		9	Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signaling, detecting, testing, inspecting, life-saving, and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating, or controlling the distribution or use of electricity; apparatus and instruments for recording, transmitting, reproducing, or processing sound, images, or data; recorded and downloadable media, computer software, blank digital or analogue recording and storage media; mechanisms for coin-operated apparatus; cash registers, calculating devices; computers and computer peripheral devices; diving suits, divers' masks, ear plugs for divers, nose clips for divers and swimmers, gloves for divers, breathing apparatus for underwater swimming; fire-extinguishing apparatus.
		38	Telecommunications.

Table SINV-36

## Nice classes in trademark data, by business sector: 1998–2022

(Nice classes)

Business sector	Abbreviation (if applicable)	Nice class	Class description
		42	Scientific and technological services and research and design relating thereto; industrial analysis and industrial research services; design and development of computer hardware and software.
Scientific research, information, and communication technology	Research and technology	45	Legal services; security services for the physical protection of tangible property and individuals; personal and social services rendered by others to meet the needs of individuals.
		14	Precious metals and their alloys; jewelry, precious and semi-precious stones; horological and chronometric instruments.
		18	Leather and imitations of leather; animal skins and hides; luggage and carrying bags; umbrellas and parasols; walking sticks; whips, harnesses, and saddlery; collars, leashes, and clothing for animals.
		22	Ropes and string; nets; tents and tarpaulins; awnings of textile or synthetic materials; sails; sacks for the transport and storage of materials in bulk; padding, cushioning, and stuffing materials, except of paper, cardboard, rubber, or plastics; raw fibrous textile materials and substitutes therefor.
		23	Yarns and threads for textile use.
		24	Textiles and substitutes for textiles; household linen; curtains of textile or plastic.
		25	Clothing, footwear, headwear.
		26	Lace, braid and embroidery, and haberdashery ribbons and bows; buttons, hooks and eyes, pins and needles; artificial flowers; hair decorations; false hair.
		27	Carpets, rugs, mats and matting, linoleum, and other materials for covering existing floors; wall hangings, not of textile.
Textiles—clothing and accessories	Clothing	34	Tobacco and tobacco substitutes; cigarettes and cigars; electronic cigarettes and oral vaporizers for smokers; smokers' articles; matches.
		7	Machines, machine tools, power-operated tools; motors and engines, except for land vehicles; machine coupling and transmission components, except for land vehicles; agricultural implements, other than hand-operated hand tools; incubators for eggs; automatic vending machines.
		12	Vehicles; apparatus for locomotion by land, air, or water.
Transportation and logistics	Transportation	39	Transport; packaging and storage of goods; travel arrangement.

na = not applicable.

**Note(s):**

Trademarks are classified under the 11th edition of the Nice Classification (NCL) of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Business sectors based on class groups are those defined by Edital.

USPTO = Patent and Trademark Office.

**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

Trademarks are allocated according to holder information. Trademarks are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named holders. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories. Trademarks are classified under the 11th edition of the Nice Classification of goods and services, which classifies trademarks under 34 categories of goods and 11 categories of services. Fractional counts of trademarks were assigned to each category to assign the proper weight of a trademark to the corresponding category under the classification. These counts are then grouped under 10 industry sectors following a mapping defined by Edital.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.

<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.

**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.

na = not applicable; metric not calculated at this level.

EU-27 = European Union; USPTO = Patent and Trademark Office.

<sup>a</sup> The United Kingdom was a part of the EU for data purposes from 1973 to 2019.<sup>b</sup> Beginning in 2020, the United Kingdom was no longer a member of the EU.**Note(s):**

USPTO patents are allocated according to patent inventorship information. USPTO patents are fractionally allocated among regions, countries, or economies based on the proportion of residences of all named inventors. Patents are classified under environmental technology areas, based on a direct mapping to Cooperative Patent Classification codes from the Organisation for Economic Co-operation and Development's Green Growth Indicators, and under climate change mitigation and adaptation technologies in agriculture and forestry. Fractional counts of patents were assigned to each environmental technology area on patents to assign the proper weight of a patent to the corresponding environmental technology under the classification. China includes Hong Kong. The United States includes Puerto Rico and all other U.S. territories.
